Product Description

The amaran Light Stand is a 2-meter (6.5 feet) height-adjustable aluminum alloy light stand built to support your amaran lights and a wide range of content creation gear. Designed for creators on the move, the amaran Light Stand provides reliable support with flexible height and angle adjustment, plus a travel-friendly, foldable design.

Adjustable height for ultimate creative flexibility. With an extendable height range from 50cm (1.64ft) to 2m (6.5ft), the amaran Light Stand adapts to any shooting scenario via its 3-section telescoping columns. Whether lighting close-up subjects or full-length content, its adjustable height offers complete control over your setup.

3-level angle adjustment. Each leg features independent 3-level angle and height adjustment, allowing you to customize your setup to your desired angle – from a wider base for additional stability, to low-angle setups, or secure placement on uneven surfaces like stairs or outdoor terrain.

Wide compatibility with 1/4-20in screw mount. Featuring a standard 1/4-20in screw, the amaran Light Stand supports a wide variety of lighting and content creation equipment – from the amaran Pano 60c & 120c panel lights to other accessories with a 1/4-20in mount.

Compact, foldable design for travel. The amaran Light Stand folds to a compact length of 43cm (1/41ft) and can be easily stored in a backpack. And weighing only 920g (2lbs), the amaran Light Stand is the perfect travel companion for your portable lighting kit, whether creating on-the-go or travelling to your next location.
