

**Name:** camRade rainCover 1X1

**SKU:** CAM-RAINCVR-1X1

**EAN-13:** 8718591673382

## Short description

Universal rain protection cover for most 1x1 light panels and LED panels, which includes a storage pouch.

## Long description

Protect your LED light panel from rain and dust during field-use with the camRade rainCover 1X1. It is an essential piece of equipment that can prevent water damage to your lighting equipment. This cover allows you to keep the location lit during (live)production.

Through years of experience and working closely with parties involved in production, camRade has improved their designs to perfect solutions for multiple applications. The rainCover 1X1 is one of the unique products from camRade, it is simple to use and compact.

### Durable and functional design

Always carry the camRade rainCover 1X1 with you so you do not get caught out when the weather turns. The cover is supplied in a waterproof zippered pouch, which you can use to store and transport the cover when not in active use. It is easy to attach and detach the cover, thanks to the convenient, universal design. Breaking down your setup when a storm is coming, or pausing a production is a thing of the past with the rainCover 1X1. The transparent vinyl fabric on the front and back sides allows you to maintain maximum light output while retaining the ease of use.

### Easy access to what is important

Multiple YKK® zippers on the left and right sides of the cover allow you to quickly access the controls, get power or DMX cables out or simply adjust the depth of the cover. The covered air inlets and outlets on the sides reduce the risk of the panel overheating by allowing hot air to escape via vents and openings.

The cover prevents water from reaching the V-Lock or Gold Mount battery, the control unit, or any AC/DC adapter. The high-density shock cord on the bottom makes it possible to fasten the cover to the lighting stand or any other mounting solution. At the same time, the length also reduces the chance that water can enter the panel through the bottom. The total length of the cover is 52 cm (20.5").

## Key features

- Universal rain protection cover, for most 1x1 LED light panels
- Waterproof near silent fabric with large transparent front and back windows
- Full access to the controls and ports on the back of the panel
- Heat outlets on the left and right sides of the cover
- Strong Easy-on / Easy-off construction
- 10-Year Warranty

Made in	China
Warranty	10-Year Warranty

## Packaging

## Why camRade?

camRade was established in 1998 and has an extensive track-record of protecting broadcast and film cameras. Since the start of camRade, the team of people behind the brand have continued to work closely with several audio and camera operators, broadcasters, and rental companies. Today we can say that we are the consolidated world leader in broadcast and film equipment protection.

## Why do I need a camRade rainCover?

Imagine how you would feel if your LED panel stopped working. An LED light with water damage could be considered a total loss if the repair costs are too high. What if you could have prevented this by using a camRade rain cover? The durability and unique features of the rainCover 1X1 make it a sound investment to protect one of your most valuable pieces of equipment while gathering the news or during field productions.

## Highlights / Unique Selling Points

Covers the LED panel's yoke and gives you the ability to tilt the panel for low or high shots.

Create an opening for cables or control on the left or right side in any vertical position.

Possibility to adjust the depth of the cover with zippers on both left and right sides.
