

# STORM 700x Skid

## Product Description

The STORM 700x Skid is a stainless-steel skid attachment that secures to the bottom of the STORM 700x. It enables users to safely place their fixture flat on the ground without the risk of the fixture tipping over, even with a CF10 Fresnel attached to the front of the light. This skid features a cutout at the rear which allows for clearance of the STORM 700x’s head cable when users are tilting the fixture up and down. With this Skid mounted, the STORM 700x with its head cable, a CF10 Fresnel, and CF10 Barn Doors attached can sit safely on a head cart or shelf.

## What’s in the Box

| Name            | Qty |
|-----------------|-----|
| STORM 700x Skid | 1   |
