

# amaran

## amaran Mini Reflector

### One Sheet

#### Main Features

- Compact, **14.5cm** (5.71in) **Bowens Mount mini reflector** designed for amaran Ray 60c & 120c lights
- **25° beam angle** for more optimized output and controlled spill
- **Parabolic shape** and **inner faceted texture** for uniform, edge-to-edge output with minimal hotspots
- Natural falloff for smoother highlights and shadows
- Quick, tool-less **Bowens Mount** attachment
- **Up to 5x output boost:** Intensifies output of the amaran Ray 60c and 120c lights to 19,530 lux @ 1m and 35,600 lux @ 1m
- Ideal for amplifying output for highlighting subjects or casting an even beam for creative flexibility

#### Product Description

The amaran Mini Reflector is a compact 14.5cm (5.71in) Bowens Mount reflector that focuses the amaran Ray 60c and 120c's beam angle to 25° to produce an optimized, even light output.

**Even, optimized light output.** Featuring a parabolic profile and faceted inner texture, the amaran Mini Reflector delivers uniform, edge-to-edge coverage with reduced spill and fewer hotspots – creating a natural fallout that flatters subjects and keeps backgrounds tidy. And with its focused 25° beam angle, the amaran Mini Reflector increases the intensity of the amaran Ray 60c and 120c lights by up to 5 times, to 19,530 lux @ 1m and 35,600 lux @ 1m, respectively.

**Full size Bowens Mount.** The amaran Mini Reflector attaches to the amaran Ray 60c and 120c lights in seconds with its standard Bowens Mount, giving you a secure fit that won't shift as you mount, adjust, and travel between shoots.

#### Product Specifications

<b>Beam Angle</b>	25°
<b>Dimensions</b>	14.5 x 14.5 x 15.8cm 5.71 x 5.71 x 6.22in
<b>Weight</b>	130g / 0.29lbs
